

TOPICAL ISSUE

**MODELLING IN
ACCELERATOR PHYSICS AND NUCLEAR MEDICINE**

Dmitri Ovsyannikov

Guest Editor

CONTENTS

PREFACE	48
<i>Taras Bondarenko, Sergey Polozov, and Yury Bashmakov</i> Simulations of angiography x-ray source based on electron channeling in crystals	49
<i>Elena Kotina, Dmitri Ovsyannikov, Viktor Ploskikh, Viktor Latypov, Andrey Babin, and Alexander Shirokolobov</i> Data processing in nuclear medicine	55
<i>Elena Kotina, and Galina Pasechnaya</i> Optical flow-based approach for the contour detection in radio nuclide images processing	62
<i>Sergey Miginsky, Seong Hee Park, Kitae Lee, Kyu-Ha Jang, Young Uk Jeong, and Nikolay Vinokurov</i> An efficient numerical method for parabolic equations	66
<i>Vladimir Rashchikov</i> Computer simulation of residual gas ionization in gas-filled neutron tubes	73
<i>Iliia Sheinman</i> Solution of self-consistent beam dynamics equation in dielectric loaded wake field wave guides	79
<i>Yury Tsyganov, and Alexandr Polyakov</i> Real-time operating mode with DSSSD detector to search for short correlation er-alpha chains	85
