Abstract

Behavior analysis of harmonically forced duffusively coupled chain of pendulums is given, results of simulation and experiments are presented.

The paper is an extended version of (Andrievsky and Fradkov, 2009).

Key words

Complex systems; Mechanical systems; Cyberphysical systems

Acknowledgments

The work was supported by the Russian Foundation for Basic Research (Project Nos. 08-01-00775, 09-08-00803, 09-01-00469) and the Council for grants of the RF President to support young Russian researchers and leading scientific schools (project NSh-2387.2008.1).

The authors are grateful to Henk Nijmeijer for stimulation this work and fruitfull discussion and Alexander Pogromsky for some ideas behind the paper. Authors also ascknowledge help of Kirill Boykov and Boris Lavrov for designing the pendulum setup.
