

CONTENTS

| | |
|---|----|
| <i>Vladislav Altsybeyev, Yuri Svistunov, Alexander Durkin, and Dmitry Ovsyannikov</i> Preacceleration of the multicharged ions with the different A/Z ratios in single RFQ channel | 49 |
| <i>Aleksandr Alyshev, Natalia Dudarenko, and Vitaly Melnikov</i> Parametric identification of reaction wheel pendulums with adaptive control | 57 |
| <i>Victoria Erofeeva, Oleg Granichin, and Ivan Senin</i> Modifying the physical process of ultrasound tomography scanning through compressive sensing | 66 |
| <i>Alexander Knyazhsky, Alexander Nebylov, and Vladimir Nebylov</i> Optimization of longitudinal and lateral motion of vehicle near disturbed surface | 72 |
| <i>Massimo Materassi and Philip J. Morrison</i> Metriplectic torque for rotation control of a rigid body | 78 |
