

CONTENTS

<i>Milan Anderle and Sergej Celikovsky</i> On the hybrid stability of the collocated virtual holonomic constraints based walking design	47
<i>Dmitry Balandin, Mark Kogan, and Ruslan Biryukov</i> Sensorless generalized \mathcal{H}_∞ optimal control of a magnetic suspension system	57
<i>Alexander Chikhachev</i> The non-stationary self-consistent model of the charged system	64
<i>Alexander Knyazhsky, Alexander Nebylov, and Vladimir Nebylov</i> Increase in the aerodynamic quality of ground effect vehicle due to the big waves turning around	71
<i>Viktor Ovchinnikov, Mikhail Nikolaev, and Vasily Litvinov</i> Algorithm for compensation of residual imbalance of a flexible rotor on active magnetic bearings	76
<i>Dmitry Shalymov, Alexander Fradkov, Svetlana Liubchich, and Boris Sokolov</i> Dynamics of the relative entropy minimization processes	80
