

CONTENTS

<i>Konstantin Amelin and Vladislav Ershov</i> Data transfer in a decentralized network of robots using a local voting protocol	219
<i>Konstantin Amelin and Vladimir Maltsev</i> Using of the SPSA method to improve the accuracy of the UAV following a given route under the action of wind loads	224
<i>Aleksandr Andreev and Olga Peregodova</i> On global trajectory tracking control of robot manipulators with a delayed feedback	231
<i>Eugenie L. Eremin, Larisa V. Nikiforova, and Evgeniy A. Shelenok</i> Nonlinear repetitive control of the metal cutting machine feed module with saturated input	240
<i>Aliya Imangazieva</i> Investigation of robust ship course control based on auxiliary loop method	248
<i>Sergei Plotnikov</i> Synchronization conditions in networks of Hindmarsh-Rose systems	253
<i>Sergey M. Polozov and Vladimir I. Rashchikov</i> Simulation studies of beam dynamics in 50 MeV linear accelerator with laser-plasma electron gun	260
<i>Evgeniia Sevasteeva, Sergei Plotnikov, and Volodymyr Lynnyk</i> Processing and model design of the gamma oscillation activity based on FitzHugh-Nagumo model and its interaction with slow rhythms in the brain	265
<i>Lyubov Shagalova</i> A viscosity solution of the Hamilton–Jacobi equation with exponential dependence of Hamiltonian on the momentum	273
<i>Olga Tomchina</i> Control of vibrational field in an elastic vibration unit with DC motors and time-varying observer	277
