

CONTENTS

<i>Leonardo Acho</i> A random signal generator by using analog electronics	5
<i>Sergey Borisenok</i> Ergotropy of bosonic quantum battery driven via repelling feedback algorithms	9
<i>Eugenie L. Eremin, Larisa V. Nikiforova, and Evgeniy A. Shelenok</i> Nonlinear robust control of large-scale system with input saturation	13
<i>S.V. Matsievskiy, V. I. Kaminskii, A. A. Gorchakov, M.V. Lalayan, M. A. Gusarova, and N. P. Sobenin</i> Linaccalc: software for accelerating structure characteristics simulation based on equivalent circuit method	22
<i>Gerasimos Rigatos</i> A nonlinear optimal control approach for the UAV and suspended payload system	27
<i>Tran Thi Thu Thao, Pham Cong Thang, Vo Duc Hong, and Vo Duc Hoang</i> A hybrid regularizers model for multiplicative noise removal	40
