

TOPICAL ISSUE

**MODELLING AND OPTIMIZATION IN
ACCELERATOR PHYSICS**

Dmitri Ovsyannikov

Guest Editor

CONTENTS

PREFACE	92
<i>Serge Andrianov and Nikolai Edamenko</i> Parametric and numerical methods for particle transport systems optimization	93
<i>Peter Bystrov</i> Sterilization installation electron beam dynamics optimization	99
<i>Sergey Kozynchenko and Vladimir Kozynchenko</i> MPI based simulation of beam dynamics in injection systems with particle interactions	109
<i>Vyacheslav Kurakin</i> Shunt impedance concept in RF cavity-moving charge electrostatics	119
<i>Lyudmila Polyakova and Vladimir Karelin</i> Exact penalty functions method for solving problems of nondifferentiable optimization	124
<i>Pavel Snopok, James Ellison, and Josiah Kunz</i> Advanced simulation tools for muon-based accelerators	130
<i>Grigory Trubnikov, Anatoly Sidorin, and Nikolay Shurkhno</i> NICA cooling program	137
<i>Sergey Zavadskiy and Anastasiya Kiktenko</i> Simultaneous parametric optimization of plasma controllers for vertical position and shape	147

Topical Issue: Modelling and Optimization in Accelerator Physics

PREFACE

The previous thematic issue of Cybernetics and Physics journal (CAP) was dedicated to different problems of modelling in accelerator physics and nuclear medicine. The present issue also contains a collection of extended versions of papers presented at the 20th International Workshop on Beam Dynamics and Optimization, BDO-2014.

More than 100 reports were submitted to BDO-2014 Workshop by representatives of the leading world research centers and universities. The short versions of these papers can be found on the IEEE web site:

<http://ieeexplore.ieee.org/xpl/mostRecentIssue.jsp?punumber=6881320>.

In the present issue more attention is given to certain optimization problems and also to the analysis and modelling of accelerating and focusing structures. Moreover, the current status of very interesting and ambitious NICA project (Nuclotron-based Ion Collider fAcility) by Joint Institute for Nuclear Research, Dubna is also considered.

I hope this special issue will be useful for many researchers in beam physics and related fields. Moreover those who are interested in the problem of modelling and optimization of the charged particle beams and plasma dynamics I can recommend to see a special issue of International Journal of Modern Physics A, 2009 — vol. 24, no. 5, where proceedings of the 15th Workshop on Beam Dynamics and Optimization (BDO 2008), St. Petersburg, Florida, USA, 10-12 July 2008 were published. Editors: Dmitri Ovsyannikov, Martin Berz and Pavel Snopok.

In conclusion, I want to express my great appreciation to Anna Golovkina for the assistance in organizing two special issues of Cybernetics and Physics journal.

Dmitri Ovsyannikov
