

CONTENTS

<i>Konstantin Amelin, Andrey Chernov, and Oleg Granichin</i> Accelerated formation-recovery layer for swarm control with a single global command	119
<i>Ali Deeb, Vladimir Khokhlovskiy, and Viacheslav Shkodyrev</i> DGA: A differential relaxation of genetic algorithms for receding-horizon control of nonlinear systems ...	129
<i>Timofei Y. Gladyshev, Anna G. Golovkina, and Vladimir A. Kozynchenko</i> Taylor-map-based polynomial approximation of non-homogeneous dynamical systems	139
<i>Vladimir A. Istomin and Igor Yu. Orlovskiy</i> State-specific transport coefficients with varying molecular diameters using machine learning methods	150
<i>Iliia A. Ivanov and Elena S. Gebel</i> Enhancing autonomous underwater vehicle reliability through functional decentralization and multi-agent interaction	162
<i>Nikita Knyazev, Vladimir Kukhtin, Alexander Ovsyannikov, A. Komlev, E. Lamzin, D. Ovsyannikov, and S. Sytchevsky</i> Trajectory analysis to verify design parameters of pm-based dipoles for sila facility	169
<i>Nadegda Krylova, Nikolay Shatil, Sergey Sytchevsky, V. Kukhtin, V. Amoskov, V. Kazantsev, N. Edamenko, C. Cabal Miraba, A. Hurskainen, A. Dyatlovich, and A. Fedotov</i> Formation of a homogeneous field in low-field pm-based MRI device	177
<i>Hoang Duc Long</i> Prescribed-time fixed-time integral sliding mode control of magnetic levitation systems under matched and mismatched uncertainties	183
<i>Dmitrii Melnikov, Nadezhda Krylova, and Alexey Glushaev</i> Optimization of the finite-element model of a 1.5 T MRI scanner's passive shimming system: assessing the impact of technological tolerances	193
<i>Dmitri Ovsyannikov and Alexander Ovsyannikov</i> On the properties of an autonomous system of differential equations	201
<i>Ekaterina Palamarchuk</i> On almost sure asymptotic stability of linear stochastic systems with multiplicative disturbances and random coefficients	206
<i>Yevgeny Somov, Sergey Butyrin, Sergey Somov, Pavel Kuznetsov, and Tatyana Somova</i> Angular guidance of navigation satellites during passing the singular orbital poses	216

Andrey Tsyganov and Julia Tsyganovav

LD-based parameter identification approach for the pairwise Markov models 222

DISCUSSIONS

Sergey Salishev

An engineering reading of the bounded halting problem and observable properties of a universal machine . 234
