

CONTENTS

<i>Alexander Aleksandrov</i>	
Fixed-time control protocol for equidistant deployment of second-order mobile agents on a line segment . .	5
<i>Vanya Barseghyan and Emil Barseghyan</i>	
Control problem of a linear non-stationary system subject to an integral constraint	10
<i>Aleksandra Grosheva, Nikolay Shatil, Victor Amoskov, Nikolai Edamenko, Tatiana Hon, Andrey Kavin, Oleg Kovalchuk, Vladimir Kukhtin, Eugeny Lamzin, Dmitri Ovsyannikov, and Sergey Sytchevsky</i>	
Simulation of solenoid to assist in EBIS design and manufacture phases	18
<i>Anton Koposov and Pavel Pakshin</i>	
Accelerated iterative learning control of multi-agent discrete systems	23
<i>Elena D. Kotina, Maria A. Nikoljukina, and Alexander V. Patrushev</i>	
Computer vision algorithms for dermoscopic images	31
<i>Evgeny Krokhaev, Ivan Arkhipov, Oleg Granichin, and Elizaveta Tarasova</i>	
Consensus algorithms of multiagent operating system	38
<i>Nikolay V. Kuznetsov, Ruslan N. Mokaev, Timur N. Mokaev, Boris R. Andrievsky, Elena V. Kudryashova, and Olga A. Kuznetsova</i>	
On the analysis of hidden oscillations and multistability In the Keldysh model of flutter suppression	56
<i>Petr Larochkin and Elena Kotina</i>	
Right-ventricular myocardial perfusion gated SPECT data processing using a deep learning model	64
<i>Daniil Mingazov, Olga Granichina, and Elizaveta Tarasova</i>	
Practical fixed-time consensus in stochastic discrete-time multi-agent systems under a nonlinear Local Voting Protocol	71
<i>Sergey Salishev and Elina Vladimirova</i>	
Neural classifier inversion: decoding latent visual semantics	85
<i>Lev Takaishvili, Vladimir Pomomarenko, and Ilya Sysoev</i>	
Identification of generalized van der pol equations from experimental time series of electronic neuron	93
<i>K. R. Zakharova, A. A. Chernikov, and S. S. Sysoev</i>	
Application of a quantum amplitude redistribution algorithm to the data filtering problem	100
<i>Bo Zhang and Boris F. Melnikov</i>	
Discrete optimization for binary phase-manipulated signals: constructing long $pm1$ sequences with low aperiodic autocorrelation	112
