

## CONTENTS

<i>Aliya Imangazieva</i> Robust control of a time-varying chain multi-agent plant .....	219
<i>Mikhail Kalmykov and Margarita Kovaleva</i> Breathers propagation in the granular locally resonant chains on the elastic foundation and their oscillatory tails .....	228
<i>Paul Kondratov, Elizaveta Tarasova, and Olga Granichina</i> Online meal delivery scheduling with order aggregation and machine learning-guided courier assignment .	239
<i>Andrey Kuchmin and Irina Tarasova</i> Analysis of the classification of formed images in the environment of the choice of a mobile robot using logical-linguistic and neural network .....	248
<i>Ruimin Ma, Xinran Hao, Dongfang Qi, Yuyi Zhang, Shixiang Zhao, Yuri Petrov, and Alexander Kovshov</i> Constitutive modeling of HSLA-65 steel using neural networks with SHAP interpretability .....	255
<i>Boris Melnikov and Bowen Liu</i> A parallelizable heuristic algorithm for planar triangulation with noisy data .....	267
<i>Arpit Sharma, Narender Saini, and Jagdeep Singh Lather</i> Trajectory control of quadcopter using F-PID controller under disturbances and uncertainties .....	275
<i>Daniil Sirota and Dmitri Ovsyannikov</i> PDE-constrained optimal control of subsurface reservoir systems via neural operator surrogates .....	285
<i>Yevgeny Somov, Sergey Somov, Sergey Butyrin, Tatyana Somova, and Alexey Dobrosotskikh</i> Nonlinear control problems of space robot in servicing geostationary satellites .....	292
<i>Denis Telichenko, Sofya Zhigalova, Evgeniy Shelenok, and Larisa Nikiforova</i> Steam pressure control system in a coal-fired thermal power plant with cross-links .....	299
