

## CONTENTS

<i>Alexander Aleksandrov</i> Stability analysis of nonstationary mechanical systems with time delay via averaging method .....	5
<i>Irina Bashkirtheva, Lev Ryashko, and Evdokiia Slepukhina</i> Stochastic generation of oscillations in the 3D-model of cool-flame combustion of a hydrocarbon mixture .	11
<i>Victoria Erofeeva and Natalia Kizhaeva</i> Partially observed distributed optimization under unknown-but-bounded disturbances .....	16
<i>Igor B. Furtat, Yuri A. Zhukov, and Stanislav A. Matveev</i> Design of optimal-robust control of step motors with partially unknown parameters and disturbances .....	23
<i>M. Isabel Garcia-Planas</i> Controllability properties for multi-agent linear systems. A geometric approach .....	28
<i>Vladimir A. Istomin, Elena V. Kustova, Semen M. Lagutin, and Ivan Y. Shalamov</i> Evaluation of state-specific transport properties using machine learning methods .....	34
<i>Ilya Kuznetsov, Vladislav Miroshnikov, and Stanislav Sartasov</i> Frequency-independent smartphone peripherals energy consumption estimation .....	42
<i>Boris Melnikov and Yulia Terentyeva</i> Greedy and branches-and-boundaries methods for the optimal choice of a subset of vertices in a large communication network .....	51
<i>Narender Saini and Jyoti Ohri</i> Load frequency control in three-area single unit power system considering non-linearities effect .....	60
<i>Pham Cong Thang, Tran Thi Thu Thao, Dang Hoai Phuong, and Mai Van Ha</i> A non-convex total generalized variation model for image denoising .....	70
<i>Alexey Zhirabok, Alexander Zuev, and Alexey Shumsky</i> A sliding mode technique for reconstruction of unknown control input in linear systems .....	82
HISTORY OF SCIENCE .....	89
<i>Alexander Fradkov and Oleg Granichin</i> Boris Teodorovich Polyak .....	89
<i>Alexander Fradkov and Natalia Naumova</i> Lev Meerovich Bregman .....	93
