

CONTENTS

<i>Alexander Aleksandrov</i> On the asymptotic stability with respect to a part of variables for a class of nonlinear systems with distributed delay	5
<i>Nikolay Babich, Ekaterina Marzel, Aleksandra Rybalko, Oleg Chen, Vladislav Chulkin, and Alexander Fradkov</i> Outline of cybernetical neuroscience	13
<i>Sergey Borisenok</i> Open-loop control on the efficiency of quantum battery with reservoir engineering	19
<i>David Castillo-Fernandez and Cutberto Romero-Melendez</i> Turnpike property in a particular class of stochastic Lotka-Volterra systems	25
<i>The Dong Dang, Ba Huy Nguyen, Igor Furtat, Pavel Gushchin, Anh Quan Dao, Minh Duc Bui, and Xuecheng Wen</i> Stabilization of nonlinear Lipschitz systems with input delay and disturbances using state and disturbance predictors	32
<i>Keli Fu, Xiaozheng Fu, and Tao Li</i> Distributed dual gradient tracking for nonconvex resource allocation with limited communication data rate	40
<i>Petr Konovalov and Alexey S. Matveev</i> Distributed algorithms for self-spreading of robotic networks over unknown complex areas in gps-denied environments	52
<i>Petr Larochkin, Elena Kotina, Dmitry Girdyuk, and Evgeny Ostroumov</i> Deep learning methods for right ventricle segmentation in radionuclide imaging	62
<i>Elizaveta Tarasova and Ekaterina Moseiko</i> Decentralized SPSA-based correction of task time predictions in adaptive multi-agent systems	67
<i>Alexey A. Tikhonov, Dipak K. Giri, Margarita V. Maksimenko, and Maksim A. Klyushin</i> Combining magnetic and Lorentz attitude control systems to solve five satellite stabilization problems	74
<i>Karina Zakharova</i> Quantum algorithm for search of the nearest element (QASNE)	83
